

## U. S. DEPARTMENT OF AGRICULTURE, WEATHER BUREAU.

## CALIFORNIA SECTION.

G. H. WILLSON, District Forecaster.

VOL. XVIII.

SAN FRANCISCO, JULY, 1914.

No. 7.

## GENERAL SUMMARY.

With regard to temperature and precipitation, July, 1914, was very nearly a normal month; the temperature being slightly lower than the normal and the precipitation slightly greater. There was more than the usual number of foggy days along the coast, and the fog was denser and more disagreeable than usual, at times amounting to a heavy mist. In the northern part of the State most of the rain fell during the first decade, while in the central and southern sections the雨iest period was from the 14th to the 21st. Thunderstorms, with light rain were scattered throughout the month.

As a whole, the weather was favorable to agriculture, though some damage was done to the prune crop through the cracking open of the fruit before harvesting. Large crops of fruit, hay and grain are being harvested all over the state. The prevailing winds were from the south and there were but few days with drying north winds in the valleys.

There were no marked warm or cool periods during the month, although in most sections of the state, the maximum temperatures occurred from the 1st to the 15th, and the minimum temperatures from the 15th to the 31st.

All the snow is gone except on the highest mountains, but the water supply is normal.

## PRESSURE.

The monthly mean atmospheric pressure for the State, reduced to sea-level, was 29.96 inches.

The highest was 30.18 inches at Eureka on the 31st.

The lowest was 29.67 inches at Red Bluff on the 25th.

The range for the State was 0.51 inch.

## TEMPERATURE.

The monthly mean temperature for the State was 72.4 degrees, which is 1.6 degrees below the normal.

The highest monthly mean was 101.6 degrees at Greenland Ranch.

The lowest monthly mean was 53.8 degrees at Point Reyes.

The highest temperature, 122 degrees, occurred at Greenland Ranch on the 8th.

The lowest temperature was 28 degrees at Greenville on the 9th and other dates.

The range for the State was 94 degrees.

## PRECIPITATION.

The average precipitation for the State was 0.06 inch or 0.02 inch above the normal.

The greatest monthly amount was 3.75 inches at Nellie while none occurred at 70 stations.

The greatest amount in 24 hours was 3.75 inches at Nellie on the 30th.

## RELATIVE HUMIDITY.

The mean relative humidity from observations taken at 5 a.m. and 5 p. m., for each of the regular Weather Bureau stations, was as follows: Eureka 90; Fresno 36; Independence 40; Los

Angeles 80; Mount Tamalpais 46; Red Bluff 38; Sacramento 61; San Diego 82; San Francisco 88; San Jose 73; San Luis Obispo 76.

## WIND.

The prevailing direction of the wind was south.

## SUNSHINE AND CLOUDINESS.

At Eureka there were 148 hours of sunshine during the month or 32 per cent of the possible; at Fresno 447 hours or 96 per cent; at Los Angeles 303 hours or 69 per cent; at Mount Tamalpais 432 hours or 96 per cent; at Red Bluff 428 hours or 94 per cent; at Sacramento 414 hours or 92 per cent; at San Diego, 280 hours or 64 per cent; at San Francisco 209 hours or 46 per cent; at San Jose 339 hours or 76 per cent; at San Luis Obispo 292 hours or 66 per cent.

## MISCELLANEOUS PHENOMENA.

*Thunderstorms*.—Alturas, 2-4, 19; Angels Camp, 18; Big Bar, 1-5, 20-22; Bridgeport, 26; Buck Creek, 1-3, 19; Cabuilla, 15, 26; Caliente, 16; Campo, 31; Chester, 1, 8, 19; China Flat, 2, 3; Colusa, 19; Converse Nursery, 9, 15, 16, 25, 30, 31; Covelo, 1-6; Crescent City, 2-4, 7; Deer Creek, 9; Dudleys, 18-20; Fresno, 17; Glennville, 17; Happy Camp, 1-3, 8; Hayfork, 1-6, 10, 11, 18; Hetch Hetchy, 18; Hornbrook, 7; Hullville (near), 3; Hume, 17, 18; Hyampom, 1-7, 10, 18; Independence, 17-22, 26, 27; Lake Eleanor, 18; Lemon Cove, 17; Lindsay, 16, 17; Livermore, 16, 17; Lone Pine, 20; Lookout, 1-4, 20; Lundy, 28; McCloud, 4, 20; McKinneys, 9; Madeline, 19-21; Markleeville, 9, 23; Montague, 2-5, 7, 19; Northfork, 18; Pilot Creek, 8; Red Bluff, 19; Ruth, 1-4, 6; Salinas, 16; Santa Cruz, 15; Seven Oaks, 15, 24, 25; Stockton, 18; Sulphur Banks, 1; Three Rivers, 16-19, 21, 22, 27, 31; Weaverville, 5; Weitchpec, 2, 3.

*Earthquakes*.—Livermore, 7.

## OBSERVERS NOTES.

*Alturas*.—All crops are in excellent condition and yields are larger than usual.—C. B. Towle.

*Cloverdale*.—Considerable damage has been done to prunes by breaking of the skins before harvesting.—John O. Ogle.

*Converse Nursery*.—July was a very windy month, the wind averaging 116 miles per day. Snow in canyons between 10,000 and 12,000 feet will last throughout the year. .61 inches of rain fell in 35 minutes on the 25th.—Edw. N. Munns.

*El Cajon*.—In this district this season seems to be the most favorable on record for the multiplication of scale insects. The lady bugs, on the other hand, are much less plentiful than usual. The reason for this may be that the cold weather last winter destroyed the preying insects and not the scale.—H. H. Kessler.

*Greenland Ranch*.—The lowest relative humidity during the month was 19 per cent, which occurred on July 8th at 5 p. m.—F. W. Corkhill.

*Greenville*.—The nights have been unusually cold. Haying is about over and grain harvesting has begun. The water is low.—C. H. Higbie.

*Weitchpec*.—All crops have done well. The water supply is normal. All snow is gone except on the highest peaks east of here.—M. E. Lathrop.

The departures from the normal temperature and precipitation are computed only for such stations as have ten or more years of record, but all complete reports are used in determining section or division means.

\*\* Temperature extremes are from observed readings of the dry bulb; means are computed from observed readings.

† Also on other dates.

T. Precipitation is less than 0.01 inch rain or melted snow.

a, b, c, etc., indicate respectively, 1, 2, 3, etc., days missing from the record.

## ERRATA. JUNE, 1914.

Chico, page 70, monthly mean temperature 70.0, should be 71.5; page 76, mean maximum temperature 85.3, should be 88.3.

Rocklin, page 71, total precipitation 1.40, should be 1.30.

Sacramento, page 76, mean minimum temperature 54.6, should be 54.5; page 71, mean temperature 67.2, should be 67.1.

San Luis Obispo, page 71, mean temperature 60.5, should be 60.4; page 76, mean minimum temperature 49.6, should be 49.5; minimum temperature on June 26th, 64, should be 60.

Summit, page 72, greatest precipitation in 24 hours 0.40, should be 0.42.

**Daily Precipitation for July, 1914.**

JULY, 1914.

Daily Precipitation for July, 1914.

**Daily Precipitation for July, 1914.**

Except as otherwise indicated observations are generally made late in the afternoon, near sunset, and precipitation recorded is for the 24 hours ending at the time of observation. \*\*\* Regular Weather Bureau station; precipitation is for the 24-hour period, midnight to midnight.

**\*\*** Precipitation measured in the morning; amount then recorded is for the preceding 24 hours.  
**f** Separate dates of fall not recorded. **T**: Trace or less than 0.01 inch.

↓ Separate dates of fall not recorded. T. Trace, or less than 0.01 inch.
