Mesoscale Discussion 1015
NWS Storm Prediction Center Norman OK
0813 PM CDT Fri Jun 26 2020

Areas affected...Eastern CO...Northwestern KS...Southwestern NE

Concerning...Severe Thunderstorm Watch 306...308...

Valid 270113Z - 270315Z

The severe weather threat for Severe Thunderstorm Watch 306, 308 continues.

SUMMARY...Scattered severe thunderstorms will propagate across the central High Plains this evening. Hail/wind remain the primary threats.

DISCUSSION...Eastern CO convection is gradually expanding in areal coverage over the High Plains. Leading edge of a loosely organized squall line currently extends from Deuel County NE - Washington County CO - Lincoln County CO. Trailing precip shield is gradually contributing to a cold pool which may result in a more progressive MCS evolving across northwestern KS over the next few hours.
