

Jan 2000

1) Keep ML over So Cal as Upper low extends to east.
Isolated showers daytime
Another disturbance in NW flow aloft w/ elev. showers
S + E of LA, late eve. esp. SAN County

2) Ridge building over CA. Models show a classic
La Niña pattern, with very fast 500mb
westerlies across the Pacific and NO. America
at mid + high latitudes, and little or no
subtropical jet.

14) Warm air aloft over So Cal w/ storm developing w of
No Cal

15) Getty Center Low 67F!
Warm SW flow aloft w/ inc, thick Ac / As overcast,
even mammatus afternoon

Sprkls + lt rain w. SFV + Conejo Valley
~ 2300 - 0100

"Subtropical plume in advance of cold front is
bringing lt showers to VTA + LA counties "late night."
