

2) Strong SA winds locally - brush fire Moorpark - 10,000 a
burned by 4th

5) ^{SA} Winds ending, very dry still 3 par. - Saugus 72/-33
SPB 57/-12 5% NE/2 G20
2pm VNT 78/-4 4% N7 BUR 75/0 5% S9
2pm. Pierce 81/4 5% SW 1

9) Fast moving wet front through SFV ~ 9pm. w/about 0.3-
in an hour.

10) Second weak "front" late w/some dzl + RW -

PIERCE CHANGE! NEW RADIATION
DEC. 8 - Change in radiation shield @ Pierce College from small
one (which seemed to give daytime temps 2-3° too h
during sunny, life winds conditions) to the larger one used
for the MANTS max-min. The larger mants shield
seems to run @ degree or two cooler than the
shelter.

Dec-13 -- new Davis station @ Pave Garpa / Chabworth
station installed.

Dec 18. Cold upper low over S. Deserts moving east into AZ
Good batch of ACSL "wave" clouds in strong N f
aloft over SFV + vicinity

Dec 22 NKX 130kt jet (NW) at 400mb (00z ^{23rd} ~~22nd~~)

Dec 26, high cloudiness in advance of system bringing rain to
Central CA. Very strong NW - N flow expected to
develop on 27th.

27) 2pm - t-storm cell W-NW-N ~ 145-200, w/
L + Thunder... no rain here as it moved toward
Newhall Pass

Second t-storm direct hit here w/ ocl L + T and pre-st
hail. Precip lasted ~ 10-15 minutes, hail 1-2 min.
Sur t-storm wrong for SFV @ 0230 due to this second
cell - moving ENE @ 35
