

Apr 2007

- 6) Upper low moving towards L.A./SAN early am. Onshore flow with haze + am. Pt., but very unstable above 2000-3000 ft marine layer. Not much local shower or storm activity with system any, but one rogue/wild/weak cell blew up near Agoura Hills ~~at~~ 3:15 am. + moved W-WNW towards Moorpark. One CB with cell hit in neighborhood here. The only CB in SoCal am. with system. No precip here - some precip indicated by radar to the WNW of here after the 3:30 am. CB. Some lightning in the cloud NW 3:30-3:40 am. + ST most of am. Thereafter.

at 3:50 am - - mushy cell to NW, mostly clear otherwise.

P.M. cu over mtns + deserts

- 9) Strong W winds N. Desert.
PGS - WJF 40 mph, + 686 mph Mojave mesonet (Mojave FAA)
EDW 60 mph
Poppy Park 60 mph

- 10) Cold front into No Cal w/rain, pressures falling interior, strong W winds in usual spots - LAX PG 28 kts PAG 48 kts
MAV 40 kts PMD 40 kts, SDB 40 kts, EDW 48 kts
Jawbone Cyn 74 mph, Five Mile 77 mph
Saugus 30 (sustained) Santa Rosa Isl 56 mph, S. Barbara Isl 68 mph

- 12) Strong jet max from NW through SoCal midday with strong NW-N winds many areas. Upper low near 16M @ 00Z
VNY 35043 (kts) @ 2007Z; vis. briefly down to 1/4 mi
