

- 24) Low Pressure over C. Baja - E to NE
flow of moist tropical air aloft
Wk low level eddy circulation w/ m.c. @ 1000-2000
- 25) M.L. 1000st. Upper low over extreme SE Calif
w/N flow aloft
- 28) Wk Upper low moving North thru L.A.
@ early AM w/ ~~st~~ brief showers here - T.
Late aft + Eve becoming cool + humid due to
deeper marine layer - 1800'
F.L. 14,000
- 29) Mod SW flow aloft - dry + stable; Wk Inv. @ 1500'
F.L. 14,000'
- 30) Wk SW flow aloft, dry + stable - Wk Inv @ 1200'
F.L. 14,000' wk low level flow
- 31) F.L. 15,000' Wk Inv @ \approx 1200' w/ weak low level flow
