

3) M.L. $\approx 1500'$ + deepening F.L. 15000'

4) Short wave trough moving through trough to maintain eddy circulation
M.L. deepening to 3000' - Mostly zonal westerly flow at

5) Rising pressures over plateau surface + aloft generally
F.L. 14,000' off-shore flow w/ mod. inv. @
surface towards North East + @
Atm. Dry + Stable 2500' S. coast.

6) High Pressure ridge moving Eastward - trough moving
towards Calif. - inc. on-shore low level flow w/
slight deepening of M.L.

7) Cold front passage AM - NE wind briefly
during evening - ^{mostly} Calm after 2300

8) Morning Smoke moving North to South just West
of here from Bell Canyon fire which burned
all the way to Malibu area

15) 3.6 quake (mi) W. of Canoga
Park @ 0157

5th 85.0 49.2 67.1

10th 83.5 50.9 67.2

15th 85.4 51.13 68.27

20th 85.15 51.15 68.15

25th 85.36 52.04 69.00

31st) 83.0 51.71 67.355

22) rain in N. Calif.

23) Var. middle + high level moisture
off-shore low level flow, F.L. 13000'
upper ridge over W. States
Cyclonic SW - W flow aloft

24) Wk Cold front passage w/ much mid
+ high level moisture from SW -
some remnant of ex-hurr. Sergio.
