

July 84

1) Coastal M.L. becoming shallow w/ a weak off-shore flow
Upper ridge over W. States, SE flow aloft over S. Calif

2) Surface low pressure over most of Calif.
and Nor. Mexico - Surface high continuing to build
into Pac. NW; wk on-shore flow - M.L. \approx
1500'

Aft. Showers in San Diego
Deserts + Mtns still a little unstable, w/ moist air aloft
SE flow aloft

3) Shallow M.L. \approx 1000' - Upper High off of Baja coast.
Weakening E - SE flow aloft; Wk on-shore flow

4) High Pressure aloft - 10,000' and upward

5) M.L. \approx 1300

6) High Pressure aloft over 4-corners region
Moist SE flow aloft - unstable moist air over interior
Thermal low pressure over deserts, high pressure over E. Pacific
M.L. \approx 1800'

7) M.L. \approx 1000' F.L. 15,000
SSE flow aloft

8) High Pressure aloft continuing over Ariz + N. Mexico
Thermal low over deserts, weakening and moving east.

Thunderstorming again for much of S. deserts + S. Mtns
ESE flow aloft. Wk on-shore low level flow, M.L. \approx 1000'

9) W. flow aloft - shallow M.L. along coast - extremely
weak on-shore flow.
