

16) MZ 1000-1500' deep - S-SE flow aloft (7/85)

17) Fl. Flood Watch from San Bern. Mtns south.

18) S-SE flow aloft of moist, unstable air.

Fl. Flood watches many mtn + desert areas

19) Fl. Flood watches + warnings most S. Calif mtns + deserts  
Many light showers coastal areas, esp. L.A. to Santa Barbara

Continuing S-SE flow of deep, moist, unstable subtropical  
air over S. Calif; wk inversion @ 1200'

29 Palms, Idyllwild, Baker area + Dth Valley - heaviest  
shower activity,

Rain here -.03" .08" Chatsworth .13" Valley Cable (Chatsworth)

.07" Northridge, .37" San Hills - None in San Gab., San Bern

20) S-SW flow aloft, air mass slowly drying + stabilizing; wk on-shore flow  
M.L. depth 1000'; Much less mtn + desert shower activity.

21) SW-W flow aloft, wk on-shore low level flow

22) Dry NW flow aloft

23) Dry NW flow aloft, on-shore flow

24) Dry anti-cyclonic NW flow aloft, substantial on-shore flow to thermal low  
over deserts

25) Light S-SW flow aloft; on-shore flow; Hurr. Jimena 750mi S of San Diego  
moving WNW.

26) Upper level high moving over New Mexico, inc. moisture expected over S. Desert  
from Mexico tomorrow. Quasi-stationary weak upper low off Calif., wk cyclonic SW flow

27) S flow aloft around upper level low, atm. moist & slightly unstable

28) wk upper trough bringing dry, stable SW flow aloft, M.L. deepening

29) Upper trough off of coast, dry SW flow

30) wk Coastal eddy, mod. on-shore flow

31) Upper trough passing over Calif, dry SW flow aloft, mod. on-shore flow
