

Sept. 1947

- 5) (7Z) Linda downgraded to a Tr. St -- incl
losing most mid & hi-level clouds - which were
streaming NE into SoCal, NW AZ, S NV + Utah.
Fl. Fl. Watch for S. Bern. Cty + most of SE Calif.
Thru the day. Most shower activity just S. of L.A.
& N. of SAN am.

San Diego's streak of days w/o measurable
rain ends today. The 14th was the
16th consecutive day w/o rain -- tying the
record, which had been reached twice
before.

- It tomod
18) kind of RW moving NE thru W. SFV this
morning -- msg C.A.! No thunder ~~briefly~~

- 23) Nora SW of Cabo by about 200 miles today --
moving NW + weakening from about 115 mph to
90 mph by eye. Nora expected to turn
more north into C. Baja + eventually
SE CA / SW AZ by 25th.

Nora has been moving very slowly NW for
a few days, after being stationary W of Mazatlan
for a couple of days.

Wk offshore flow L.A. w/ hot temps all the
way to the beaches.

- 24) At 2am, Hurr. Nora was 200 mi S of Pt. Eugenia,
with winds of 86 mph to 103 mph.
Nora was moving N @ 13 mph + long 115 W Long.
It is expected to move into extreme SE CA this by
evening (the 25th)
Meanwhile moisture in front of the storm in
conjunction with a trough / upper low
